

## **Press Release**

Envases Universales de Mexico is pleased to announce that it has entered into a definitive agreement (subject to the normal closing conditions) to acquire Glud & Marstrand, a leading manufacturer of high quality metal packaging solutions focused on the food market, as well as specialty metal promotional and media packaging.

Glud & Marstrand offers an extensive range of steel and aluminum packaging products to customers across a wide range of food markets including luncheon meats, ham, fish, dairy, and cookies, as well as specialty media products. The Company, which is headquartered in Løsning, Denmark, serves customers across the world from its network of nine manufacturing facilities located in Europe, the United States and Asia.

The Envases Universales Group is a leading manufacturer of rigid packaging solutions with 27 plants across Mexico, Central America and South America. The Company is focused on the manufacture of steel cans, aluminum cans, and plastic packaging for the beverage, food, paint and chemical markets.

The shareholders of both corporations have expressed their complete satisfaction with the purchase and consider it a success for the new Glud & Marstrand investor. The merger of the decades of experience in the manufacture of metal packaging held by both Envases Universales and Glud & Marstrand, as well as the two companies' complementary manufacturing technologies, will enhance Envases Universales and Glud & Marstrand's ability to support customers' growth with high quality packaging solutions on a global scale.
